Subject: Application for Biomedical Engineer

Dear Hiring Manager,

I am applying for Medequip's Biomedical Engineer role in Kigali, bringing hospital and regional experience in equipment installation, maintenance, and staff training.

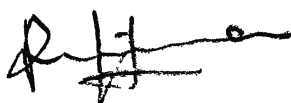

I have over 7 years installing, commissioning, maintaining, and training users on hospital equipment. At Norvik Hospital I serviced diagnostic and monitoring systems. During four years as Biomedical Manager at International Hospital Kampala, I led laboratory, theatre, ICU, and radiology installations. That included haematology analysers, chemistry analysers, blood bank machines, CT, X-ray, oxygen plant, and ICU systems, plus preventive maintenance, staff training, and COHSASA accreditation support. As Biomedical Programs Manager at Gould Family Foundation (GFF), I led biomedical engineers and technicians across Uganda, Kenya, Tanzania, Burundi, Malawi, Somaliland, and Rwanda.

Since March 2025 I have undertaken personal biomedical contracts in Uganda, Congo, Kenya, Tanzania, and Somaliland, handling installation, maintenance, user training, and service documentation. In Congo, I completed laboratory, theatre, and radiology installations, including at the hospital serving the Kibali Gold Mine. I currently also work as a Data Analyst at FairBanks Medical Centre, using Python and SQL for FCHIP data-quality checks, dashboards, and reporting, and am the Founder and Developer of HOSSPI (<https://hosspi.com/>), linking hospital workflows, biomedical engineering, and live analytics.

I hold a BSc in Biomedical Engineering from Makerere University, speak fluent English, and am ready to relocate to Kigali, travel for assignments, and learn your product lines through international training.

My CV is attached. Thank you for your time - I would be glad to talk.

Yours sincerely,

Wasswa Wilson

Biomedical Engineer
