Hiring Team

Agromavericks

Kampala, Uganda

Subject: Application for Full Stack Software Developer (Ref: AM-2026-1407)

Dear Hiring Team,

I am writing to apply for the Full Stack Software Developer job at Agromavericks (reference AM-2026-1407). I live in Kampala and I want to join your in-house team working on the Agromavericks and Ukofi platforms.

I have practical experience with the technologies in your job post, including Next.js, TypeScript, Tailwind CSS, React Native and Expo, Convex, Better Auth, Resend, WhatsApp messaging, Bunny.net, Vercel, and EAS. I also work with Node.js APIs, SQL databases, Prisma, JWT and role-based access, testing, and CI/CD, plus Java, PHP, MySQL, Azure, and AWS. I am the Founder and Developer of HOSSPI (<https://hosspi.com/>), connecting hospital workflows and live analytics. I have also shipped Shulekeeper (Next.js, TypeScript, Laravel, AWS), endoscopy reporting software for two hospitals, and the Wekebere Android monitoring app. Separately, I built and deployed an AI reception agent for a law firm in Texas that answers calls, manages appointments, and follows up with clients - and it is in active use. At IHK I led 64-slice CT and digital X-ray installation; my analytical experience includes oxygen-demand modelling and compliance evidence there, laboratory data analysis and Python research pipelines at UVRI, and current FCHIP analysis using Python, SQL, data-quality checks, and dashboards at FairBanks Medical Centre.

As Biomedical Programs Manager at Gould Family Foundation (GFF), I led biomedical engineers and technicians across Uganda, Kenya, Tanzania, Burundi, Malawi, Somaliland, and Rwanda. I trained engineering teams and clinical users, including doctors, nurses, and apprentices. I led the NICU upgrade at Mama Lucy Kibaki Hospital in Nairobi, Kenya, and developed equipment SOPs for partner facilities.

I like building products that people actually use. Your work on agricultural financing in Uganda is clear and useful, and the hybrid Kampala setup fits me. I am legally allowed to work in Uganda and would be glad to talk about how I can help.

I have attached my CV. Thank you for your time. I look forward to hearing from you.

Yours sincerely,

Wasswa Wilson

Full-Stack Software Developer
