11 September 2026

Mr. Robert Muwanga
Kampala, Uganda

An introduction, on the recommendation of Juliet

Dear Mr. Muwanga,

My colleague Juliet suggested that I write to you and share my CV, and I am glad to do so.

My name is Wasswa Wilson. I am a biomedical programmes leader, data analyst and full-stack software developer based in Kampala, with over nine years across hospital engineering, research and software. My experience includes seven-country team leadership at GFF, independent consulting and founding HOSSPI. I would welcome a conversation about where this experience could be useful to you or your network.

Regional biomedical programme leadership

As Biomedical Programs Manager at the Gould Family Foundation, I led biomedical engineers and technicians across Uganda, Kenya, Tanzania, Burundi, Malawi, Somaliland and Rwanda. I managed regional planning, implementation and reporting, and trained biomedical engineers, technicians and clinical users, including doctors, nurses and apprentices.

Hospital software development

I am the founder and developer of HOSSPI (<https://hosspi.com/>), a hospital management system connecting patient records, clinical care, laboratory and pharmacy workflows, billing and live analytics. It also supports biomedical engineering and role-based access. I am also building a cross-sector application for data collection and reporting.

Research, data analysis and reporting

At the Uganda Virus Research Institute, I analysed laboratory data and developed research pipelines in Python. At International Hospital Kampala, I developed and tested oxygen demand models during COVID-19 to support supply planning. My current work includes Python and SQL analysis, data validation and management dashboards for FairBanks' Community Health Intelligence Platform. I also use MATLAB and Excel.

Hospital management and independent consulting

I managed the biomedical function at International Hospital Kampala for four years, maintaining equipment records and compliance evidence for COHSASA accreditation. I now undertake independent equipment installation, commissioning, maintenance and clinical user training in Uganda, DR Congo, Kenya, Tanzania and Somaliland.

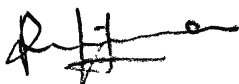

Proposal and grant writing

I write institutional proposals, grant applications and partnership documents, including community health, accelerator and investment submissions for FairBanks, with financial annexes and supporting evidence.

I have attached my CV, together with a single file containing this letter, the CV and my academic and professional credentials. I would value a short conversation at your convenience, whether about work within your own firm or simply to be pointed towards others who may find this useful.

Thank you for your time, and please pass on my thanks to Juliet.

Yours sincerely,

Wasswa Wilson

Data Analyst, Biomedical Engineer and Software Developer
